

# Process Optimisation

**Situation before:** Compressed air was used to remove empty pouches in a packing line of a confectionery manufacturer.

## IMPROVEMENT DONE

The compressed air system was replaced by a simple low wattage blower fan to achieve the same function with much lower energy requirements.

## ECO IMPACT

**Savings/year:** 601,665 kWh

**Savings/year:** Rs. 47,38,112

**Cost:** Rs. 40,000

**Payback time:** 0.01 years
